

Organizational Conflict Of Interest

Prime Solicitation/Contract Name/Number: ANT-3026-03

(“Offeror”) is committed to prevent, avoid, or mitigate an Organizational Conflict of Interest (“OCI”) or the appearance of an OCI as defined in Federal Acquisition Regulation (“FAR”) Subpart 9.5 during the performance of any award associated with the above-identified effort. Offeror understands the obligations intrinsic to Government programs whose systems engineering, technical direction and evaluation and other advisory and assistance services invoke implicit OCI requirements. The purpose of Offeror’s OCI avoidance and mitigation procedures is to maximize technical objectivity over the entire period of performance and, in a systematic and controlled manner, eliminate the potential for bias or unfair competitive advantage. By rigorous control of all sensitive information and full adherence to the requirements contained in this certification Offeror will first report, and then prevent, avoid, or mitigate any organizational conflicts which may result during the performance of an award under this solicitation.

OCI is any relationship, interest, commitment or obligation or any kind that may adversely affect, contravene, or conflict with the services to Offeror will perform.

The Government is most concerned about potential OCIs in the following scenarios:

1. When a contractor’s work under one Government contract, either as a prime contractor or subcontractor, could entail evaluating itself or a related entity, either through an assessment of performance under another contract or an evaluation of proposals (impaired objectivity OCIs);
2. When performance of the work under this solicitation would place an Offeror in a position to make technical, design, or programmatic recommendations that would include hardware, software, system design, integration, or production of systems provided by the Offeror’s organization; or
3. When the provision of the engineering and technical direction described in the Statement of Work would create the situation prohibited by FAR 9.505-1 because the Offeror is currently a prime contractor, subcontractor, or consultant on a contract for the supply of a system covered by this solicitation or any of its major components.

Offeror warrants that, to the best of its knowledge and belief, there are no relevant facts or circumstances concerning any past, present or potential contracts or financial interests relating to the work Offeror would perform associated with the above-identified effort which could give rise to an OCI.

ATTESTATION (Check one box below)

To the best of my knowledge and belief, Offeror does not presently have any OCI issues which would diminish its capacity to give impartial, technically sound and objective assistance and advice, or would result in a biased work product, or result in an unfair competitive advantage.

Offeror proposes to mitigate any actual or potential conflict of interest or unfair competitive advantage that does or may exist with respect to the above-identified effort with the attached Mitigation Plan.
