Warrenton Administrative Building

Comprehensive Interior Design (CID) Package Volume Two: Furniture, Fixtures & Equipment (FF&E)

**Issue For Bid
April 26, 2022**

National ATIS Facilities and Engineering Services for
Terminal Facilities Execution Team
Contract: 697DCK-19-D-0002

Jacobs

Challenging today.
Reinventing tomorrow.

100% Comprehensive Interior Design Package

Volume Two: Furniture, Fixtures & Equipment (FF&E)

Table of Contents

1. FF&E Interior Design Narrative
- FOR 2. FOR REFERENCE ONLY
3. FF&E Procurement Data Specification Sheets
4. FF&E Placement Plans

FOR REFERENCE ONLY

1. FF&E Interior Design Narrative

A Comprehensive Interior Design (CID) package is provided as part of the project deliverables. The CID package is comprised of two parts, the Structural Interior Design (SID), and Furniture, Fixtures and Equipment (FF&E). The SID Package includes interior building finishes for floors, walls, ceilings, millwork, window coverings, and interior signage. The FF&E Package includes furniture, fixtures, and equipment specific to the project and user requirements as described below. The FF&E finishes will be coordinated with and complement the interior finishes to provide a cohesive and aesthetically pleasing interior environment.

The following is a description of the Warrenton Administrative Building FF&E requirements:

The building lobby is outfitted with soft lounge seating and glass occasional tables selected to complement the terrazzo floor and communicating stair with wood clad built-in seating. Soft seating is also provided throughout the building in break out areas, small gathering spaces, and the pre-function conference area.

The mother's room has millwork with a sink, an undercounter refrigerator, soft seating, and side tables for two users. Break rooms are provided on each floor and are outfitted with millwork including a sink, built in space for (4) microwaves, storage, and (2) refrigerators. A large seating area is provided outside the first floor break room offering tables of varying heights and plastic chairs to allow space for both dining and meeting.

Conference spaces are centrally located on each floor with the conference center comprised of one large dividable conference room with seating for 70 people on the first floor. Stacking chairs and flip-top reconfigurable tables are provided in the dividable conference room to accommodate a variety of meeting settings. Large conference tables, mid-back conference chairs and AV credenzas are provided in all other conference rooms.

The pre-function conference space is outfitted with recessed seating and support millwork. Adjacent to the enclosed conference overflow space and off the main lobby is the dedicated hoteling area, providing space for 24. Locker storage is provided off the hoteling area in an otherwise unused niche.

Open office areas are outfitted with staff and contractor workstations varying in size from 8'-0" x 8'-0" to 8'-0" x 6'-0". Workstations are arranged with shared spines perpendicular to the north and south exterior walls to maximize the number of workstations that can be accommodated within the open office area.

All workstations are comprised of fabric wrapped panels and glass stackers with an overall height of 63". An electric height-adjustable primary worksurface with a dual monitor arm is provided as well as an open shelving storage unit, 2-drawer lateral file and 53"H personal storage tower. Keyboard trays and freestanding task lights are also included. Additionally, 3-drawer lateral files are provided at the end of workstation clusters to provide additional storage for the users.

Private offices are outfitted with L-shape solid wood casegoods that include a full-size desk, electric height-adjustable worksurface with dual monitor arm and keyboard tray, credenza with an open shelving storage unit, 2-drawer lateral file, overhead storage with task lighting and tackboard below, and a freestanding storage tower with open shelving and an enclosed wardrobe with coat rod. A task chair, (2) guest chairs, and glass markerboards have also been provided.

A secure storage room with 5-drawer lateral files is provided on the second floor. The remaining storage rooms are outfitted with wire shelving or a combination of wire shelving and metal storage cabinets. One workroom is provided with (4) technical benches and 36"D wire shelving units.

 OPEN OFFICE TYPICAL 1, 8'-0" X 8'-0" (Scheme One)

QTY.
 117

PRODUCT SHALL MEET THE FOLLOWING SALIENT FEATURES:

Manufacturer	Herman Miller (Basis of Design)
Model Name	Canvas Wall
Model Number	TBD By Furniture Dealer
Dimensions	8'-0" x 8'-0"
Description of Salient Features	<p>General: (4) 48"W x 53"H fabric tiled panels; power/data tile above worksurface at spline and power/data tile below height adjustable worksurface; (4) 48"W x 11"H thin profile glass stackers, (1) 72"W x 30"D electric height-adjustable primary worksurface with painted metal C-legs, (1) 72"W x 24"D secondary worksurface, (1) 36"W open shelving unit, (1) 36"W 2-drawer lateral file, (1) 24"W x 24"D x 53"H storage tower with box/box/file and enclosed wardrobe with coat rod and side-facing bookcase. Include (1) dual monitor arm, (1) keyboard tray, (1) freestanding task light, wire management, and pencil tray for box/box/file. Provide knockouts along base and at power/data tile above and below worksurfaces as described, and (1) desk top power module with (4) simplex receptacles and (2) USB ports. Wiring configuration to be 8-wire harness, 2+2. Refer to electrical drawings for power location diagrams.</p> <p>Construction: Worksurfaces to be laminate with vinyl edge bands, storage components and grommets to be painted metal, drawer pulls to be integral. System must be UL Certified. Frames must be welded with an integrated leveling system. System must have a Universal connector that allows for ease of reconfiguration using less parts. Provided fabric panel tiles that consist of a metal frame with integrated metal clips. Power and USB outlets must be provided above the worksurface. Provide programmable receptables.</p> <p>Specific Compliance: Product must be from ISO 9001 and/or ISO14001 accredited facilities. Meets all ergonomic guidelines by ANSI/HFES 2007 Requirements Human Factors Engineering of Computer Workstations. Furniture must be certified to meet the emissions required for low-emitting ANSI/BIFMA X7.1 standards and certifications. In lieu of disposing furniture in a landfill at the end of its useful life, manufacturer shall provide opportunities for customer to recycle, resell or refurbish their used furniture. Product shall be minimum Level ® 1 Certified with the BIFMA e3 Furniture Sustainability Standards to meet or exceed the most current environmental standards in the furniture industry.</p>

Provide knockouts along base and at power/data tile above and below worksurfaces as described, and (1) desk top power module with (4) simplex receptacles and (2) USB ports. Wiring configuration to be 8-wire harness, 2+2. Refer to electrical drawings for power location diagrams.</p> <p>Construction: Worksurfaces to be laminate with vinyl edge bands, storage components and grommets to be painted metal, drawer pulls to be integral. System must be UL Certified. Frames must be welded with an integrated leveling system. System must have a Universal connector that allows for ease of reconfiguration using less parts. Provided fabric panel tiles that consist of a metal frame with integrated metal clips. Power and USB outlets must be provided above the worksurface. Provide programmable receptables.</p> <p>Specific Compliance: Product must be from ISO 9001 and/or ISO14001 accredited facilities. Meets all ergonomic guidelines by ANSI/HFES 2007 Requirements Human Factors Engineering of Computer Workstations. Furniture must be certified to meet the emissions required for low-emitting ANSI/BIFMA X7.1 standards and certifications. In lieu of disposing furniture in a landfill at the end of its useful life, manufacturer shall provide opportunities for customer to recycle, resell or refurbish their used furniture. Product shall be minimum Level ® 1 Certified with the BIFMA e3 Furniture Sustainability Standards to meet or exceed the most current environmental standards in the furniture industry.</p>
